About this calendar
Aberdeen Airport is delighted to have the opportunity to launch this River Don Fly Calendar in association with the Aberdeen Angling Association. Aberdeen Airport is committed to sustainable development and protecting the environment. As part of this commitment, we are working closely with the Angling Association to understand the impact of airport discharges on the River Don. We will continue to monitor the biological quality of the river along the Parkhill Beat and look forward to an ongoing, positive working relationship with the Association.

The Fly Calendar is designed to allow anglers to predict what aquatic insect species are present in the River Don at a particular time of the year. The calendar is based on actual biological analysis from the river in the area of Parkhill Beat carried out by a qualified ecologist.
